

## ABOUT US

AMAP is dedicated to the development, production, and use of modified asphalts. We promote technical research, education, production, and planning assistance and welcome members from all areas of our industry, including research organizations, polymer and asphalt production companies, contractors and governmental agencies.

Founded in 1997, we are a member-driven organization and need your support to turn our goals and objectives into meaningful results.

Association of Modified Asphalt Producers  
P.O. Box 305

# TOMORROW'S BETTER ROADS – TODAY

---

Join the Association of  
Modified Asphalt Producers

---

## WHY IS MODIFIED ASPHALT BETTER?

1. Builds roads that last longer
2. Offers greater resistance to rutting and fatigue cracking
3. Provides a quieter ride for drivers

# A Leading Voice in the Modified Asphalt Industry

When you become a member of AMAP, you join forces with other industry professionals who are passionate about growing and marketing the benefits of modified asphalt. In addition to acting as a consolidated voice on industry issues, we focus on:

- Encouraging user-producer groups to use higher-performing binders
- Evaluating and communicating advancements in modified asphalt technology
- Promoting standardization of asphalt binder testing procedures

*Join today to help us continue this important work.*

## WE GIVE BACK

### The Dr. David R. Jones IV 2015 Asphalt Scholarship Fund

This annual scholarship is funded by AMAP dues and donations. It honors Dr. David R. Jones IV, a prominent figure in the asphalt industry throughout his entire career. Most notably, Jones was a key part of the Asphalt Research Team at the University of Texas, responsible, in part, for the Performance Graded (PG) Asphalt Binder Specification. He was a member of many industry committees, and held 24 asphalt-related patents or patent applications.

## BENEFITS TO YOU

Owners, contractors, and specifying agencies can all benefit from AMAP membership. In addition to learning more about the performance and economic benefits of modified asphalt binders for bituminous pavements, you get many opportunities throughout the year to meet, collaborate and benchmark with your peers.

### Attend Our Flagship Event

The AMAP Annual Meeting draws research groups, polymer producers, asphalt suppliers, contractors and government agencies to learn about the latest technical and business aspects of the modified asphalt market.

### Make an Impact

AMAP committees span a variety of areas including Education, Membership, Marketing and Technology. There are always activities in progress to benefit members and advance the role of modified asphalt in infrastructure and construction projects. Whether you join as a member or take on a committee or leadership role, you can apply your knowledge and experience to make a difference for our association and our industry.

## BENEFITS TO THE INDUSTRY

2.6 million miles. That's the estimated amount of paved roads and highways in the U.S. And, 93% percent of those roads are surfaced in asphalt. Because these roads continue to be expanded, modified and maintained, there are extraordinary growth opportunities for modified asphalt. Together, we can build greater demand for the superior longevity of our technologies and products.
