

ASSOCIATION OF MODIFIED ASPHALT PRODUCERS

Technical Seminar and Workshop

The Education committee of AMAP will again present an Asphalt Seminar and Workshop on February 7th, 2012 just prior to our 13th Annual Conference at the magnificent Hyatt Regency Tamaya, Santa Ana Pueblo in New Mexico.

The workshop will be presented by Drs. Robert Kluttz of Kraton Polymers and Laurand Lewandowski of Owens-Corning, Mr. Ronald Corun, P.E. of NuStar Energy, John Casola of Malvern Instruments, Chris Lubbers, also of Kraton Polymers and J.V. Martin of Innophos, Inc. The session begins at 1:00 pm and will conclude at approximately 5:30 pm.

For those interested, registered attendees will receive a certificate for 4 hours of Professional Development Credits.

The pre-registration fees for this event are: **DOT, students and government employees--\$25.00; representatives of AMAP member companies--\$50 each; non-AMAP member company personnel, \$100 each.**

This course covers all aspects of asphalt, from the chemistry of asphalt, what modification does to asphalt binders, construction techniques and handling of asphalt and modified asphalts, testing procedures and testing equipment and asphalt emulsions and other asphalt uses.

Everyone in the asphalt paving industry will benefit from this comprehensive course. It is designed so that that engineers and non-engineers will receive a great deal of the most up-to-date technical information.

The best and easiest way to register for this event is to go online at www.modifiedasphalt.org and find the annual conference link and register for this event and the general registration all together. Or, you may simple use the form included herein and fill in the section on the general registration form under *Technical Seminar and Workshop*.

See you in glorious New Mexico.
